## RHUBARB

You're missing some mighty fine eating unless you have some clumps of Rhubarb on your place. It's the first in the early spring to provide you with tart sauce and delicious pies. The newer varieties listed below stay tender and delightful all Summer long. Put the root divisions in 2 feet apart.

### MCDONALD'S CHERRY

6862. Originated in Canada. The crowns are red . . . the stems are red. Center of the stems is just as red as a cherry. Makes the most delightful sauce. Grows 3 ft. tall. You can pick it all Summer long. **Strong Divisions, Each 70c, Postpaid.**

### RUBY RED

6863. What color and what flavor! It is red all the way through. Makes the most beautiful red sauce for desserts and pies. Can be picked all Summer . . . not just in the Spring. Sweet and juicy clear up until freezing weather. **Strong Divisions, Each 70c; Postpaid.**

### CHIPMAN'S CANADA RED

# HOME PLANTING HEADQUARTERS FOR THE NATION

**EARL E. MAY**

**Radio Station KMA**

Every week-day, the year 'round, KMA brings you a world of information on the planting and care of Flowers, Fruits and Vegetables. Tune to KMA, 960 in the center of your dial, for programs especially planned to help you have more beautiful lawns and yards . . . more fruitful orchards and gardens.

## Dear Friends :

Right away, ahead of everything else, I want to thank you all for the orders you sent to us during the past year. Because of so many fine orders we again had the biggest year in the company's history. Of course, we feel proud of this and it is an inspiration to us.

Your confidence in us is also a challenge to continue sticking like glue to the policies and principles which have made us so many friends. My father, the founder of the company, laid down those rules over a quarter of a century ago. They are simple rules but our business couldn't have grown so successfully unless we followed them religiously. Even though you know them as well as I do they are worth repeating here. Quality, honest value, and friendly service. Nothing new or sensational about it but it is still all that counts in a business of any kind.

I believe you will be interested in the general situation on Nursery Stock and Seeds. We will start the season with ample stocks on nearly everything we list. However, it isn't humanly possible to make all things come out even. Before the season is anywhere near over we will be out of some things and be wishing we had more of them to take care of the later orders.

It will sound like an old story, but the early order is still the best and only way of being absolutely sure of everything you want. Also, the earlier you plant your trees and bushes and nursery plants, the sooner they get started. You gain extra weeks of growth and development. You are rewarded with earlier fruiting, and larger, more abundant bloom.

And we reward you, too, as you can see by the list of premiums on the opposite page. There is your bonus for early orders for Nursery Stock. And you'll find more premiums listed on Page 25 which give you still another bonus for early orders for Vegetable Seeds and Flower Seeds. I will be happy if every one of you order early enough to entitle you to these extras. It helps us to give better service and takes some of the load off of the last minute rush.

Remember always, our guarantee of complete satisfaction. We want your orders, early or late, big or little. And we will be doing everything in our power to deserve them. I hope we have your good will and that you can say a good word for us to your friends and neighbors.

Best wishes to all of you for a successful season, a prosperous season, and real happiness.

Sincerely,  
*Edward H. May*

Here is a separate little note of thanks to all of you who have written me letters. I read some of them on my KMA programs but can't hope to broadcast all of them. Believe me, they are an inspiration. I'd be lost without them. Keep them coming.

Early Orders are going to be a great help to us this year and we express our appreciation of them with these premiums. Even though the nursery stock isn't shipped until planting time, we can get all the "book work" done well ahead of the last minute rush. This really makes a saving for us, in worry as well as work, and so we are glad to say "thank you" for early orders with these premiums. If you send your nursery order reasonably early, you are welcome to your choice of the premiums on the schedule listed below. (These premiums limited to nursery orders from this catalog.)

You are entitled to more than one premium with the larger orders. You can have them alike or assorted. Every year thousands of our customers send us signed checks with the amount left blank to be filled in with the correct amount to cover the order. This works out fine for everyone because the checks are always filled out for the exact amount of the order and at the lowest prices in effect the day the order is received.

### MOST THINGS POSTPAID

You will see that most everything in this catalog is delivered to you Postpaid. This represents a big saving to you. Some things too large to go by parcel post are quoted "Not Prepaid". We ship these by Express. But, since nursery stock goes at the low second class express rate, the charges you pay on such shipments are generally as cheap as freight, sometimes even less.

If your order includes some of the larger items which must go by Express and some which would be postpaid by us, then we will send the entire order by Express. This will avoid making two separate shipments.

For this privilege we will include some extra nursery stock which has a greater value than the additional express charge amount to.

## QUINTUPLET APPLE TREE

Here is one of the miracle achievements of Horticulture! A single tree from which you can pick 5 separate and distinct varieties of Apples. You can enjoy the many fruits of a whole apple orchard even though you have room for only one or two trees. How is the Quintuplet "Apple Orchard tree" produced? Five expert budders are assigned to one row of trees. Each man carries buds of only one variety and inserts one bud in each tree. When these five budders have finished the row, each tree has those five varieties budded into it. Since each bud makes its own separate limb growth, they will produce the exact variety of fruit which was budded on. Plant one or two of our Quintuplet Orchard trees and you will really have as many or even more kinds of apples than are produced in most home orchards.

6126. When you plant our Standard Quintuplet Apple Orchard tree, you pick (1) **Wealthy**, an early Fall all-purpose apple; (2) **Yellow Delicious**, late Fall eating and baking apple; (3) **All Red Delicious**, finest of all eating apples; (4) **All Red Jonathan**, greatest all-purpose apple, and (5) **Crimson Winesap**, fine for eating and cooking and one of the best winter apples.

## CHINESE CHESTNUT (Blight Resistant)

6899. Now you can grow your own richly delicious chestnuts again. This new, sturdy Chinese Chestnut is another outstanding achievement. It is blight-resistant, thoroughly tested and proved for heavy production of high quality nuts, slightly larger than produced on native trees. Thrives in wide variety of soils, hardy wherever native chestnuts are hardy. **Sturdy 2-year seedling trees, best for transplanting. 15 to 18 inch size: Each 85c; 2 for \$1.65; 4 for \$2.95, Postpaid.**

## The New Larger THOMAS BLACK WALNUT

A wonderfully improved new strain which bears much earlier and has larger nuts with a softer shell almost as easily cracked as the English Walnuts.

6886. The picture above was taken on the farm when this Thomas Black Walnut tree was 4 years old. The tree yielded a bushel of nuts. The year before it had about  $\frac{2}{3}$  of a bushel and the year before that about  $\frac{1}{2}$  bushel. How's that for early bearing? **And friends, look at the size of the kernel, larger than a half dollar. ## IN OUR SEED LABORATORY

Hundreds of tests are made each season in our Seed Laboratories where this picture was taken. I was checking germination on a number of varieties of beans. This is just one of the TRIPLE-TESTS fully explained at the right. Triple-Testing assures you the utmost in dependable quality.

Dear Friends:

I have an idea for our garden plans this year that is new and different and will, I am sure, be a real help to you. But, first I want to make sure you read about the way we Triple-Test every pound and every packet of our vegetable seeds. It is because we so carefully and so thoroughly Triple-Test our seeds that I know they will bring you the best vegetables, the finest flavors, and the biggest yields.

Even if you don't read the rest of this letter, I surely want you to read about the Triple-Testing at the right. It's the best of all assurances that you will be glad you ordered from us.

Now for the new ideas. Every gardener with any spunk likes to be among the first to begin to eat good things from his garden. It is important, too, because it marks the beginning of big slashes in food costs. So, on some of the pages which follow you will find this little emblem. When you see it you will know that it points out the variety which is the earliest of all. That's one idea and here is another.

Quick freezing is becoming more important every year, too, and we have made special tests to determine those varieties which are best for this process. Wherever you see this emblem—you will know **FREEZIT** it is especially fine for Quick Freezing.

I hope you will find these ideas really helpful and, of course, I hope you will send your order right away. While we like and appreciate every order you folks send us, big or little, early or late, we especially appreciate the early orders. If every one waited until the last minute we would all be in the mad house.

We appreciate early orders so much that special premiums are given to you if you send your order reasonably early. They are listed below.

Thanks for the fine orders you sent us last year, thanks for your many fine letters, and best wishes for a good gardening season.

Edward May

## IN OUR LABORATORY

Every packet, every pound of our vegetable seeds is Laboratory Tested to assure you High Germination. We know they are ready and "anxious" to grow before they are ever put in the packet and bags to be sent out to you. Literally, thousands of these tests are made each year in our laboratory. That's one reason why our customers report such good stands and such high yields from their gardens.

## IN OUR 76-ACRE TEST GARDENS

Every year we plant scores of varieties of vegetables in our 76-acre test gardens . . . old favorites and new ones, too. In these tests we search out the thriftier, heavier yielding varieties. Time and again we discover a superior plant growing in an already established strain. From this superior plant our improved strains are developed. The name of the variety is the same but our tests show one strain to be very much better than the others. It is the better, the improved strains, we packet for our customers.

## ON OUR TABLES

Yes, that's the final and very important test . . . because you want the finer textured, finer flavored vegetables from your garden. We bring in truck loads of vegetables from our test gardens and just pass them out to folks here at the seedhouse to try in their own kitchens. From all their reports we know exactly which varieties give the greatest taste satisfaction. Plant our seeds and enjoy the finer textured, finer flavored, really nicer varieties.

# ONION PLANTS

**Easy to plant. Easy to grow. And they make tremendous yields of big, mild, sweet onions.**

Once you've seen and eaten fine big onions grown from plants, you'll always plant them. Light frosts and freezes, even a light snow, won't hurt them. So, you can put them out extra early to get a full growing season. Plant them about 1½ inches apart. The first time you thin them out for "green" onions. The next thinning for stewed onions. Then, let the rest go on to make you plenty for fall and winter use. Order at least 2 varieties: **WHITE BERMUDA** for the mildest you've ever eaten and **YELLOW SWEET SPANISH** for a good mild onion that keeps for months. Shipment made at proper planting time. # Earl May TOMATOES

## RUTGER'S MAIN CROP (77 DAYS)

### Best for Canning

765. We introduced this great tomato 10 years ago and it has been growing in popularity ever since. It is the best, large, red, main crop tomato of them all. It is the most dependable big crop tomato, too. *The fruits are large and the quality is unsurpassed. The plants are strong and have just enough foliage to protect the fruits from sun scald.* The large, bright scarlet tomatoes ripen from the inside out, evenly all the way through. The deep red, solid flesh is exceptionally fine for slicing and canning. No hard cores. *They hold their large uniform size and keep bearing clear up until frost hits them in late fall.* We had Rutgers' Tomatoes this year from our own vines up until the tenth of October. You'll get a larger yield from Rutgers' than any other variety we know of. An all around, all purpose, home garden tomato.

Big Pkt. (over 800 seeds) 10c; 1/2 oz. 30c; ounce 55c; 1/4 lb. \$1.65, Postpaid

757. **MARGLOBE.** (77 days.) Always produces a fine crop of very uniform, smooth, round, solid fruits. Marglobe is a great big fellow, bright red, very productive. Pkt. 10c; 1/2 oz. 25c; ounce 45c; 1/4 lb. \$1.30, Postpaid.

756. **PONDEROSA.** (88 days.) The great big tomato. Big Pkt. 10c; 1/2 oz. 50c; ounce 95c, Postpaid

755. **RED OXHEART.** (90 days.) Enormous tapering fruit. Big Pkt. 10c; 1/2 oz. 50c; ounce 95c, Postpaid

759. **WHITE QUEEN.** (78 days.) Delicate, mild, anti-acid. Ivory white. Pkt. 15c; 1/2 oz. 45c, Postpaid

## PRESERVING TOMATO

784. **YELLOW PEAR.** Pkt. 10c; 1/2 oz. 40c, Postpaid.

**CULTURE:** 1 packet produces 100 plants; 1 ounce about 1500 plants. Four or five weeks ahead of when you want to set plants in the garden start the seed in a hotbed or small box in the window. Plant rows 3 inches apart, cover 1/4 to 3/4 inch deep. When plants are 1 inch high transplant to 1 inch apart each way. When all danger of frost is past set the plants in the garden 3 to 4 feet apart each way.

Red Cloud ripens unbelievably early! Plants set out early in May yield some ripe tomatoes in Mid-July and will be in full production by August 1st. *Three to four weeks earlier than Rutgers!* You can be eating Red Cloud out of your garden when tomatoes are selling for 7c to 10c apiece. ## SIoux

Smoothest Large Early Tomato

762. (65 days.) You can count dozens of big smooth tomatoes on the Sioux vine above. The foliage was removed to show you what a wonderful set of fine fruit you can expect from this new variety. *In our test gardens, every blossom cluster on Sioux vines set from 2 to 7 tomatoes (as many as 97 tomatoes on a single vine!). That means not only a great bumper crop but also a continuous supply of tomatoes.* The fruit is large, extra smooth, and much more meaty-solid than the old varieties. Sioux ripens uniformly to a beautiful bright red (no green shoulders or spots) and the flavor is truly delicious. Be sure you have Sioux in your garden this year. You'll agree it is a great variety.

## LANDSCAPE SERVICE

*for Our Customers*

Our Landscape Architects are ready to help you with the problem of effectively planting your property. Each home requires a distinctly separate application of landscape principles and our Landscape Architects will treat your problem as a separate plan, "custom tailored" for your property. We are confident they will achieve a pleasing and attractive effect, one that will bring you pride and pleasure for years to come.

Whether you are going to make the complete planting in one season or accomplish it in sections over a period of two or three planting seasons, it is essential that everything be planned before anything is planted.

You will want your planting, first, to show the mark of expert landscape advice and, second, to be a planting of permanence, one which becomes more beautiful with each passing year. You will enjoy both this distinction and this permanence with plans from our Landscape Service . . . because our Landscape Architects are fully qualified in both essential parts of the work. They are graduate specialists with a wide knowledge of all the plants which may be recommended to you. The fine quality of Earl May Nursery Stock is further assurance of your complete and lasting satisfaction.

### Something For You.

We are prepared to send you a Sketch Sheet along with complete instructions for making a simple outline of your property. You will also receive a Check List which will give you an opportunity to conveniently tell us the things you especially want included in the Landscape Plan created for your home. For example, you can tell us the shrubs you prefer, or other things you would like included in your Landscape Plan. You can specify that you would like an Outdoor Living Room, a Picnic Area, a Rose Garden, or any one of many such special features. Your preferences will be considered as your Landscape Plan is made and they will be included if they are consistent with good Landscape Architecture.

### About the cost.

The Sketch Sheet, Instruction Sheet, and Check List will be sent to you for 25c, to cover printing and mailing costs. If you then decide to have our Landscape Architects make a plan for your property there will be a charge of \$10.00. However, when you purchase \$75.00 or more worth of planting materials from us that \$10.00 will be deducted from the total bill. In this way, your Landscape Plan will actually cost you nothing. We must, however, make that charge at the beginning because preparation of Landscape Plans, where Specialists in the profession are engaged, is an expensive and time-consuming process.

# MAYGOLD HYBRIDS

## Every Kernel Bloodline Bred

### CRIB FILLING YIELDS

Bushels-per-acre is still the most important test of the real worth of any hybrid corn. And, leading the list of "bests" you can get when you plant Maygold Hybrids is Bumper Yields . . . more bushels per acre. Year after year Maygold Hybrids demonstrate their high yielding ability to farmers all over the corn belt. And they should . . . because our Bloodline Breeding brings a balance of the finest characteristics to our hybrids. Maygold Bloodline-Bred Hybrids are the result of over 28 years of seed corn specialization.

### RUGGED RIGID STALKS ROOTED DEEP AND WIDE

There aren't any "ifs" about the way Maygold Hybrids stand against wind and weather. Those stiff rugged Maygold stalks stand in the face of gale-like winds. They are nailed in place with an anchor web root system which holds deep and wide into the soil. They will be standing erect and ready at harvest time, ideal for clean and easy picking. This toughness, this strength is bred right into Maygold Hybrids. It is put there by using the finest of inbreds. It is held there by painstaking, careful cross breeding. You can count on it.

### DEEP KERNELS . . BIG EARS . . FILLED TO THE TIPS

You'll be proud of your Maygold fields. And prouder still when you tell your neighbors about your Maygold yields. The ears are big and filled clear to the tips. They are as

alike as two peas in big size. And the high shelling percentage will tell you the kernels are certainly deep, the cobs mighty small. Maygold Bloodline Breeding does it!

### RICH IN FOOD VALUES LIVESTOCK LOVE IT!

Your livestock will be the first to show you that Maygold Hybrids are second to none for fine feeding quality. Livestock goes for Maygold Hybrids, chooses them in preference to others. Then, you'll get final and convincing proof when you sell your livestock. You will see that you got faster, more economical gains. That means extra money in the bank for you. Maygold Hybrids are fully ripened on the stalk . . . because the foliage stays green to put every last ounce of weight and feeding value into those ears.

### UNIFORM PERFECT STANDS FAST PROGRESSIVE GROWTH

"Come quick" energy is bred right into Maygold Hybrids. It assures you those perfect stands you must have for maximum yields and for easy cultivation. That same vigorous prodding energy pushes Maygold Hybrids along to rapid growth and full development. Great resistance to all unfavorable conditions is part and parcel of our Bloodline Breeding Program. Maygold Hybrids have a world of "fight." It is put there, surely and scientifically, with proved inbreds. It is natural for them to have the extras needed to assure you consistently higher yields.

### PLANTER TESTED GRADES EXCLUSIVE "DERMATIZED" TREATMENT

Your planter will sing a smooth unbroken song with Maygold Hybrids in the boxes. The grades are tailor made with the finest precision machinery in the business. One grain just like another. Bag after bag the same. With Maygold precision grades you'll be done with stops and starts, no more fuss or bother.

"Dermatized" is a word you will never see except on Maygold Hybrids. It is an improved treatment. It is ours, alone. This treatment gives Maygold Hybrids extra resistance to cold wet weather . . . protects seeds against soil borne diseases . . . assures you high germination, better stands, bigger yields.
